# Knox County Ares Operations Manual

## I. BACKGROUND

The Amateur Radio Emergency Service (ARES) has been providing communications assistance in times of disaster since the 1930's. Consisting of federally licensed Amateur Radio operators, ARES members have the purpose of providing emergency communications to public safety and public service Agencies and organizations. Knox County ARES is autonomous and is capable of providing local communications and message handling in the event a disaster or emergency situation. ARES is organized at the county level and operates at the direction of the county Emergency Coordinator(EC) who is an American Radio Relay League (ARRL) member, Licensed Amateur Radio Operator and Trained in the National Incident Management System (NIMS).

## II. PURPOSE

The purpose of the ARES Operations Manual is to outline the organization and capabilities available for deployment in the event of an emergency or disaster situation.

## III. SITUATION AND ASSUMPTIONS

It is assumed that some level of radio communications within the County will survive the effects of a disaster. Trained radio operators can provide emergency communications services and technical support for the incident's response agencies and organizations.

Knox County ARES has the capability to operate fixed, portable and mobile radio stations. In Knox County, the fixed radio stations are located within a facility that are involved with emergency response and recovery efforts. Portable stations include "go-boxes" and handheld radios. Mobile radio stations are stations permanently mounted in a vehicle.

### A. Knox County Control Station

The American Red Cross Training Center is the County's Control Station; it is located behind the American Red Cross Chapter House. The Radio Station can be operated by the entire ARES membership team to handle messages. The facility also stores the Mount Vernon Amateur Radio Club equipment and supplies. In times of emergency, the ARES membership will receive their initial briefing. When the facility is not active in emergency response it serves as the ARES training center. The capabilities of the county control station are listed in (TAB-K County Control Station).

#### **American Red Cross Chapter house**

300 North Mulberry St.  
Mount Vernon, OH 43050  
Chapter House Phone (740) 397-6300  
Radio Station (740) XXX XXXX

### B. Knox County Emergency Operations Center (EOC) Station

The information in the document is Classified "For Your Information Only", it is only to be distributed to those agencies and organizations with a need to know. For more information, contact the Knox County ARES Emergency Coordinator: pvalentinoknoxco@gmail.com

# Knox County Ares Operations Manual

The Knox County EOC is located internal to the Knox County Sheriff's Office. This facility is operated by the Knox County ARES Leadership Team, it provides emergency communications services for the EOC and guidance to the County Control Station. The capabilities of the EOC station are listed in (TAB M Emergency Operations Center).

## **Knox County Sheriff's Office**

### **Knox County Emergency Management Agency**

11540 Upper Gilchrist Rd,

Mount Vernon, OH 43050

Phone: (740) 393-6772

Radio Station Phone: (740) 399-3994

Radio Station Phone: (740) 399-3995

## **C. Additional Control Stations**

### ***1) Knox Community Hospital***

This radio station provides emergency communication for the hospital and receives situational awareness updates from the EOC. This facility is operated by the ARES Membership.

### **Knox Community Hospital**

1330 Coshocton Ave,

Mount Vernon, OH 43050

Phone: (740) 393-9000

See Contact Listing for specifics

### ***2) Personal Radio Stations***

Members of the Knox County Amateur Radio Club may be included in the response from their home using their Personal Radio Station. These Radio Stations are capable of providing Health / Wellness nets and Weather Nets. These stations are encouraged to have an alternate power source. A list of personal radio stations is in (TAB – A List of personal Radio Stations)

### ***3) Mobile Radio Stations***

A mobile radio station is used while in motion or during deployment at specified facility. There is an ARES operator with a handheld radio operating from the location where a fixed radio station does not exist or from the County's Mobile Command trailer. A District Radio Station is a Mobile Radio Station. Mobile Radio Stations must have backup battery packs or an alternate power source. A list of Mobile Radio Stations is in (TAB – B List of Mobile Stations)

The information in the document is Classified "For Your Information Only", it is only to be distributed to those agencies and organizations with a need to know. For more information, contact the Knox County ARES Emergency Coordinator: pvalentinoknoxco@gmail.com

# Knox County Ares Operations Manual

## IV. ARES MEMBERSHIP

### A. Eligibility

ARES Members are assigned a location within a district (TAB – J District Map) at the time of deployment. They will be required to operate independently at different response agencies and organizations. Therefore, ARES members must possess an Amateur Radio license, pass a background check and complete their NIMS training certificates.

### B. Credentialing

The credentialing agency is the Knox County Emergency Management Agency. The Knox County Sheriff's office will perform a criminal history background check. When an ARES member separates from service, the identification badge and any other county owned property must be returned to the ARES Emergency Coordinator.

### C. Equipment

Members are expected to have at a minimum a handheld radio, experience with the Mount Vernon Amateur Radio Club's "Go Boxes" and maintain a personal state of readiness. ARES members who operate from home are encouraged to have an alternate source of power.

ARES Members who separate from service are responsible to return their ID Badge and any other county property in her possession.

### D. Availability

ARES Membership is voluntary and should communicate their availability to deploy to their district manager. Before deploying the membership should:

- Take care of yourself
- Take care of your immediate family
- Take care of your neighbors

### E. Training

The ARES Membership is encouraged to keep themselves technically up to date. Emergency response is a structured operating environment. The agencies and organizations served will expect the membership to be knowledgeable on how EOC operations are handled and are conversant with the staff. Therefore, it is required that the membership complete these online trainings within six (6) months and complete an ARES application. Please ensure the EC receives a copy of your training certificates. To start the training process each member must acquire a Student Identification Number (SID).

#### SID

The information in the document is Classified "For Your Information Only", it is only to be distributed to those agencies and organizations with a need to know. For more information, contact the Knox County ARES Emergency Coordinator: pvalentinoknoxco@gmail.com

# Knox County Ares Operations Manual

To start the training process students, need to register for a FEMA SID (Student ID)

## IS Courses

<http://www.training.fema.gov/is/crslist.aspx>

Search for Independent Study (IS) WEB based courses.

## ARES Application

<http://arri-ohio.org/SEC/fsd-156.html>

The Amateur Radio Emergency Service® (ARES) consists of licensed amateurs who have voluntarily registered their qualifications and equipment, with their local ARES leadership, for communications duty in the public service when disaster strikes.

When completing the application be prepared to enter your station's capabilities and be sure to attach any completed ICS training certificates.

### **1) Membership Group**

IS-100- Introduction to Incident Command System

IS-700.A- National Incident Management System (NIMS)

### **2) Leadership Group**

IS-100- Introduction to Incident Command System

IS-200.b - Single Incidents and Initial Action Incidents

IS-700.a- National Incident Management System (NIMS)

IS-800.b - National Response Framework

## **F. Code of Conduct**

Knox ARES members are expected to conduct themselves in a professional manner at all times while participating in any ARES activities or when representing the organization.

Members must follow the rules and regulations of the facility where they are assigned.

## **V. Roles and Responsibilities**

This section lists the primary Role and Responsibility of the different ARES Positions. See (TAB – Q for a list of position contacts).

### **A. Emergency Coordinator (EC)**

Promote and enhance the activities of the Amateur Radio Emergency Service (ARES) for the benefit of the public as a voluntary, non-commercial communications service.

Will be involved in communicating the interest of ARES to the general public and media.

The information in the document is Classified "For Your Information Only", it is only to be distributed to those agencies and organizations with a need to know. For more information, contact the Knox County ARES Emergency Coordinator: pvalentinoknoxco@gmail.com

# Knox County Ares Operations Manual

Maintain a contact listing of all ARES district managers and the membership.  
Manage and coordinate the training, and organization of ARES membership for an emergency response.

Support the Section Emergency Coordinator/Section Manager.

Develop detailed local operational plans with "served" agency officials and establish protocols for mutual trust and respect. All matters involving recruitment and utilization of ARES volunteers in response to the needs of agency officials, including; technical issues and security of message transmission of others.

Establish local communications networks and periodically test those networks by conducting realistic drills and exercises.

Establish an emergency traffic plan, with Health / Welfare traffic inclusive, utilizing the National Traffic System as one active component for traffic handling. Establish an operational liaison with local and section nets, particularly for handling Health / Welfare traffic in an emergency situation.

In times of disaster, evaluate the communications needs of the jurisdiction and respond quickly to those needs. The EC will assume authority and responsibility for emergency response and performance by ARES personnel under his/her jurisdiction.

Foster an efficient and effective Amateur Radio response overall to the served agencies. Promote growth in the ARES program, making it a robust valuable resource and able to meet local needs.

Report regularly to the SEC and prepare After Action Reports for the Membership.

## **B. Assistant Emergency Coordinator**

Members will act in the absence of the EC to oversee all operations and activities, interface with served agencies and conduct normal business.

## **C. County Control Coordinator.**

This position is knowledgeable of and distributes the Mount Vernon Amateur Radio Clubs emergency equipment and supplies. This position will also perform or direct equipment tracking protocols and conduct briefings.

## **D. District Manager**

This position will head up district operations during a disaster or emergency, working directly with the served agency and other key players to pass on handle messages between the ARES County Control and the Emergency Operations Center.

The information in the document is Classified "For Your Information Only", it is only to be distributed to those agencies and organizations with a need to know. For more information, contact the Knox County ARES Emergency Coordinator: pvalentinoknoxco@gmail.com

# Knox County Ares Operations Manual

## E. Knox County ARES Membership

The position will assist the District manager to achieve their district objectives in times of an emergency.

## F. Leadership Team

Knox County ARES has a Leadership Team. This team consist of subject matter experts that provide guidance to the Emergency Coordinator. The purpose of the Team is to assist the Emergency Coordinator in establishing Knox County ARES as a leader in emergency communications to served agencies. These positions are appointed by the Emergency Coordinator and have additional training. They provide technical assistance to served agencies, and are instrumental in the design/development of projects.

Determine what agencies and organizations are active in the area, evaluate their needs, and determine their compatibility with ARES. Ensure that the clients understand ARES capabilities and limitations.

Promote digital communications and resources, train and encourage members, and facilitate digital applications for served agencies.

Provide technical assistance in the operation of repeater communications and other communications resources.

Coordinate support of the National Traffic System by moving or handling traffic into and out of Knox County. This Team is responsible for training ARES members in handling traffic.

In an emergency, this Team is responsible for developing local ARES protocols and procedures.

## VI. Concept of Operations

Amateur radio is recognized as a valuable backup or a alternate communications platform. ARES members augment communications and support emergency operations.

To be effective ARES membership must maintain a state of personal readiness.

**ARES does not “Self Deploy”.**

It is difficult to create a tightly structured Incident Action Plan (IAP) simply because every emergency situation is different and requires a separate IAP.

When possible the EC will Notify the Membership of a pending disaster or emergency situation using the mass notification tool “Knox Alerts” (TAB – C, Knox Alerts) (TAB –D, Notification

The information in the document is Classified “For Your Information Only”, it is only to be distributed to those agencies and organizations with a need to know. For more information, contact the Knox County ARES Emergency Coordinator: pvalentinoknoxco@gmail.com

# Knox County Ares Operations Manual

Message Templates) prior to activation.

When no advance warning is available the EC will Activate the Leadership Team using “Knox Alerts”. The alerting message will provide activation guidance. (TAB E, Activation Message Templates)

The EC will prepare an ICS form 201 Initial Incident Action Plan (IAP) (TAB – F, ICS 201) and ICS 205 Incident Radio Communications Plan (TAB – G ICS 205). The EC or AEC will activate the ARES membership by district.

The district managers will report to the ARES County Control Station to pick up their emergency equipment, supplies and receive an incident briefing from the County Control Manager.

The County Control manager may decide that an in-person briefing is not plausible or necessary. In this example the County Control manager may deploy the district manager to a location. In this example an incident briefing must still occur.

Once the District Manager is on location and has sized up the situation, the manager may activate the district membership.

All communications between the County Control, EOC, Hospital, districts, State and etc. must be Logged using the (TAB H, ICS 213 Log)

All request received for a ARES initiated communications must be document using (TAB – I, ICS 213)

## **A. ARES County Control**

The Radio station may be activated when the EOC is not activated, if the EOC is activated County Control will be activated.

## **B. EOC**

The Radio station at the EOC will be staffed when the EOC is activated

## **C. NET CONTROL**

A Net Control station will be established between the County Control, EOC, Hospital and from an individual operating net control from home.

## **D. MESSAGE HANDLING**

ICS 213 general message form will be used to document operations operational communications. Each communication request will be recorded in the ICS-213 Log (TAB - I).

The information in the document is Classified “For Your Information Only”, it is only to be distributed to those agencies and organizations with a need to know. For more information, contact the Knox County ARES Emergency Coordinator: pvalentinoknoxco@gmail.com

# Knox County Ares Operations Manual

## E. NET OPERATION

ARES incident related nets have priority on the repeater with the exception of a request for life and safety. Should a conflict arise net control operation has the authority to:

Listen to make sure the repeater or desired frequency is clear. Politely ask for use of the repeater or frequency.

Announce, THIS IS "Call Sign" calling the Knox County ARES net into session for an emergency situation. This is a controlled net, "Call Sign" is net control. We appreciate your cooperation in keeping the frequency clear. We're now listening for Emergency, priority traffic or time orientated traffic.

At 10 minute intervals in accordance with FCC rules; identify the net, "This is "Call Sign", an emergency net is in operation for Knox County ARES. Thank you for your cooperation!"

"MEDICAL" – Members should use this phrase to report a situation that requires immediate medical attention. All other traffic on the net must immediately stop, and remain stopped until the medical situation has been handled.

"EMERGENCY" – Any member with an emergency situation should use this phrase to request immediate assistance, safety response (police or fire), or declare some event that's taken place that presents an immediate threat to life safety or property. All other traffic on the net must immediately stop, and remain stopped until the emergency has been handled.

"PRIORITY" - This is an urgent situation (without life or property safety concern) that warrants immediate attention by the net. An example might be to report a missing child. Net Control should immediately recognize this station and receive the message. Other stations should stand by until at least the original message has been handled.

"INFORMATION" This is used when you have information that can help with a discussion taking place during a net. NCS should recognize your call-sign and allow you to provide your information.

"SEVERE WEATHER" Net TAB-R will facilitate information flowing between the Central Ohio Severe Weather Net and ARES. This NET is mostly a "listening" position. The primary purpose of net control is to monitor severe weather activity and report the activity to the EOC if activated.

## F. TACTICAL CALLSIGNS

While operating the net, stations may be assigned "tactical" call-signs. Tactical call-signs are

The information in the document is Classified "For Your Information Only", it is only to be distributed to those agencies and organizations with a need to know. For more information, contact the Knox County ARES Emergency Coordinator: pvalentinoknoxco@gmail.com

# Knox County Ares Operations Manual

helpful when they are used to identify specific locations, such as “EOC” or “Command” or “Hospital”.

## **G. IDENTIFICATION**

The FCC rules don’t go away during emergencies! Remember when using tactical call-signs, Net Control must allow the station to voice their personal call-sign at the end of their transmission, per FCC requirements.

## **H. ARES Notification and Activation**

As a part of the Ohio ARRL Section, Knox County ARES has guidelines in the Ohio Section Emergency Response Plan. EC, AEC’s and members should have a working knowledge of the provisions including alerting, station requirements, and preferred frequencies.

ARES may be activated by the Emergency Management Director, the EC or AEC.

### **1) Notification**

When possible the EC will notify the Membership of a pending disaster or emergency situation using the mass notification tool “Knox Alerts” (TAB - D Notification message template) prior to activation.

### **2) Activation**

When no advance warning is available the EC will Activate the Leadership Team using “Knox Alerts”. The alerting message will provide activation guidance. (TAB - E Activation message template). The Alternate methods of ARES Activation are: radio, phone, texting and email.

## **I. HOW TO RESPOND**

There is no official ARES uniform; members are encouraged to dress professionally and according to the situation and expected weather conditions. ARES does offer reflective safety vests for purchase, they help to identify your membership when operating at a remote facility.

ARES Membership should always display their Knox County ID when deployed.

Bring your handheld(s) and any other radio gear you consider necessary after learning the specifics of the activation or event.

Bring your own personal items such as medication, water, snacks and clothing for the weather. As a volunteer, you are responsible for your own; medical, liability, auto and equipment and safety.

The County Control will provide a briefing with specific information to each member with assignments, such as: Specific location (address, etc.). Point of contact. Frequency you’ll be

The information in the document is Classified “For Your Information Only”, it is only to be distributed to those agencies and organizations with a need to know. For more information, contact the Knox County ARES Emergency Coordinator: pvalentinoknoxco@gmail.com

# Knox County Ares Operations Manual

operating on once there, Operational period and any other details.

## **1) WHEN YOU ARRIVE**

When directed to a specific assignment, you should drive with due caution to reach your location safely. Park in a safe place so as not to block traffic.

Meet your contact person, discuss where you will set up your station, review what duties you have and make sure to get a cell number for your contact.

Check-in with Net Control when you're operational and ready to send/receive messages.

Check out with Net Control if you're taking a break or when your shift is over.

## **VII. TRAINING AND EXERCISIES**

### **A. Weekly**

Knox ARES holds a radio net every Sunday at 9:00PM. This net offers an opportunity to practice Net operations and test your radio equipment.

### **B. Quarterly**

Knox ARES will schedule a training meeting every quarter. These trainings are typically held at the ARES Command Post. Members are urged to attend these training sessions to stay current and informed.

### **C. Public Service Events**

A large part of service to our community is providing communications at public events. This service is provided at no charge, and the event is relative to Emergency Preparedness

#### **1) *Guidelines for Public Services Event Coordinators.***

- Initial contact with the organization to determine needs, times and scope of the project.
- Determination of our participation (number of volunteers, time, place)
- Soliciting ARES volunteers to cover the event
- Maintaining contact with the organization for changes and updates (maps, etc.)
- Update volunteers by email as plans develop
- Email specific assignments and duties immediately prior to the event with frequencies, reporting times, expected duration, any supplies needed, CELL NUMBERS, etc.
- Net control the event (or designate a net control)
- Follow-up with communication to the organization, and thanks to the members
- Report members and times to EC for logging and reporting purposes

The information in the document is Classified "For Your Information Only", it is only to be distributed to those agencies and organizations with a need to know. For more information, contact the Knox County ARES Emergency Coordinator: pvalentinoknoxco@gmail.com

# Knox County Ares Operations Manual

- 

## 2) ***Guidelines for ARES Members.***

All members are urged to participate in ARES sponsored events. These events help to train ARES Membership.

- County ID
- Have radio, antenna and power ready to go.
- Make sure you know how to operate the radio (changing frequencies, repeaters, etc. on the fly)
- Bring or obtain an ARES vest. The vest must be worn when outside, especially near traffic areas!
- Bring water and any other personal supplies (medicine, bug spray, clothing) you might need
- Bring a printed map so you're familiar with the event and your location
- CHECK IN. Once there and ready to go, formally check into the net and confirm your position.
- CHECK OUT. When taking breaks or leaving the event.
- When operating an event REMEMBER YOUR PERSONAL SAFETY COMES FIRST!!
- Report any problems to the EC to be included in the AAR.
-

## TAB R Weather Net

### Knox County ARES Severe Weather Net Script and Procedures, revised 8/15/2017

**This is (your callsign) putting the repeater into net mode.**

*(Transmit the DTMF control tones to put the repeater into weather net mode. You will hear the announcement "File three load.")*

**My name is (your name and ARES title if any). I am net control for this Severe Weather Net of the Knox County ARES for (today's date). The alternate net station is (name and callsign). Are you there, (name)?**

**The National Weather Service has issued the following (warning, watch):**

*(Read the NWS message.)*

**Are there any reports of severe weather? We want reports ONLY for**

- **Hail 1/2 inch or larger or covering the ground.**
- **Trees uprooted or downed, large healthy limbs downed (3" or larger).**
- **Wind or other storm damage to buildings etc. winds greater than 50 MPH.**
- **Tornadoes, wall clouds, funnel clouds or persistent cloud rotation.**
- **Rainfall greater than 1 inch per hour or less (measured).**
- **Flooding that poses a hazard and where it doesn't normally occur.**
- **Flooding that results in evacuations or rescues.**
- **Roads closed due to high water.**
- **Do not report lightning**

The information in the document is Classified "For Your Information Only", it is only to be distributed to those agencies and organizations with a need to know. For more information, contact the Knox County ARES Emergency Coordinator: pvalentinoknoxco@gmail.com

## Knox County Ares Operations Manual

(If the weather threat is **not immediate**, go through a check-in. If the threat is **immediate**, defer any check-ins until after the threat has passed.)

1. (Establish a liaison with the Central Ohio Severe Weather Net if they are active. Then ask the liaison to relay reports of Severe Weather as they are reported to us.)

2. (Give a current weather report from the NWS about every 15 minutes or as the situation develops.)

3. (Have someone relay any emergency situations to 9-1-1 for Knox County.)

**All stations please check in now with the just the suffix of your call sign only - that's the letters following the numeral - in ITU phonetics; no other information at this time. Over.** (Log and acknowledge all suffixes heard. Say "I have XX, YYY, and Z, any others?" Do not hesitate to ask the net to "stand by" or say "net hold" if you have trouble copying a station, need to sort out stations who double, or if check-ins are too fast for you to log. If you do say "net stand by" or "net hold," let up on the mic button to make sure you are not doubling with someone else, and that you have control of the net. Then sort out what you need to and proceed with more check-ins. When no further stations check in, and all stations have been acknowledged, proceed.)

**When I call your suffix, please come back with your full call sign in ITU phonetics, your name, and if you are in Knox County, your general location (NE, SW, S, Central, etc.). If you are outside of Knox County, just give your county name. No other information at this time, please. Just call sign, name and what part of the county you're in.** (Start at the top of the list, call out a suffix, and log the station's full call sign, name, and location. When you get to the bottom of the list, ask if there are any further check-ins, suffix only. Log and acknowledge them. Then go back to those stations and get their full call signs, names, and locations).

**Is there any emergency or priority traffic? Are there any reports of severe weather?**

(Wait for traffic for 5-10 seconds after the repeater carrier drops. If a station has traffic, log and acknowledge it by repeating the station call sign and the traffic's intended destination. For example, "I have KC8XXX with 1 for KD8YYY" or "I have KC8XXX with 2 for Newark." After acknowledging any traffic, ask if there are any stations on the net that can handle it, and take care of it immediately. Proceed with the net.)

**This is a directed net and it is important for net control to know who is**

The information in the document is Classified "For Your Information Only", it is only to be distributed to those agencies and organizations with a need to know. For more information, contact the Knox County ARES Emergency Coordinator: pvalentinoknoxco@gmail.com

participating and available at all times. During an emergency, if you must leave the net, permission to do so must be requested of and granted by net control. During all nets, please make use of the appropriate break tags as noted in the Standard Operating Procedures.

**I will now do a roll call.** *(Go down your check-in list and call for each station.)*

**I will now take any final check-ins or stations with questions or comments for the net. Please call now.** *(Log and acknowledge any final check-ins, ask them for their comments or any questions. Proceed to close the net.)*

**This is (your callsign), net control for this session of the Knox County ARES net. I would like to thank all stations that checked in tonight for their participation and support. I would like to thank my alternate net station (name and call sign). (Name,) how many check-ins did you count?** *(Reconcile the total.)*

**ARES thanks the Newark Amateur Radio Association for the use of their repeater for the operation of this net. All stations may now secure. This net is closed at (time) local time. I will now tone the repeater.** *(Transmit the control tones to take the repeater out of net mode. You will hear the announcement "File one load." Then sign off.)* **This is (your callsign) clear and returning the frequency to general amateur use. 73.**

**FINAL TASK: EMAIL THE LOG WITH TOTAL COUNT TO**  
**pvalentinoknoxco@gmail.com**
